

Beckfield Community,

It is with great pleasure that we announce the 2023 NCLEX pass rate statistics. The Associate Degree Nursing program has a 93% pass rate\*; the Bachelor of Science, Nursing program has an 88% pass rate\*.

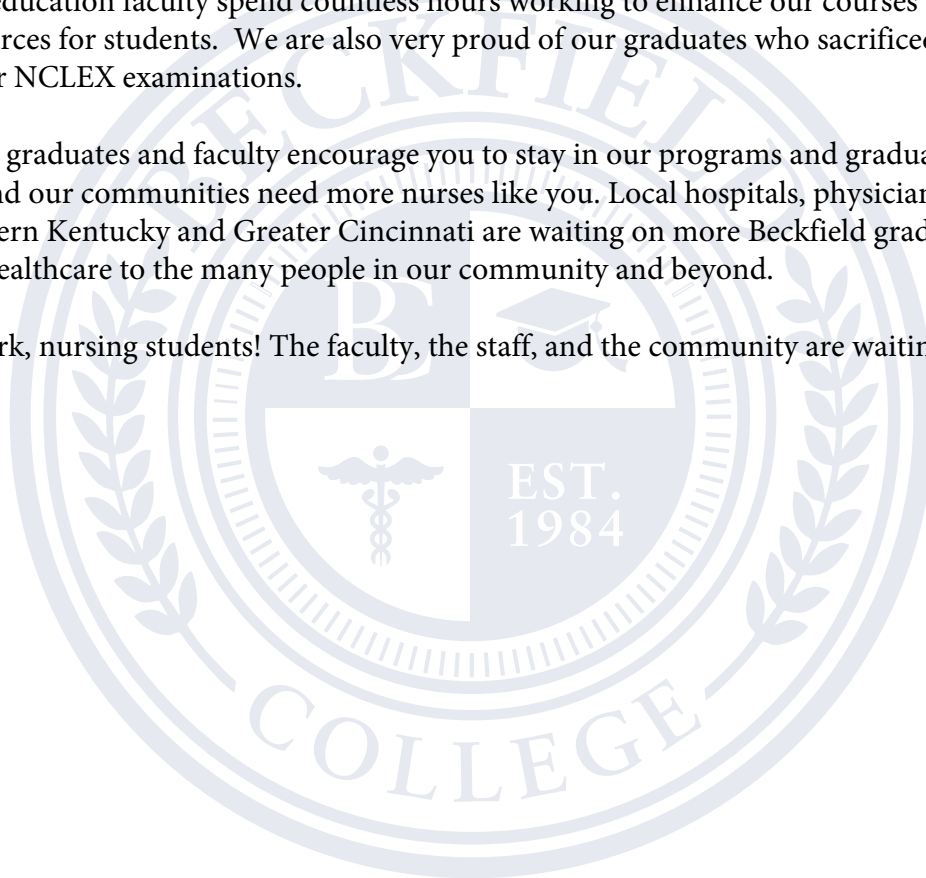

We thank our talented and hardworking faculty and staff for their commitment to our nursing students. Each day our nursing and general education faculty spend countless hours working to enhance our courses to provide the best possible instruction and resources for students. We are also very proud of our graduates who sacrificed so much to earn their degrees and pass their NCLEX examinations.

Let the success of our graduates and faculty encourage you to stay in our programs and graduate. There is currently a shortage of nurses, and our communities need more nurses like you. Local hospitals, physician offices, and retirement care centers in Northern Kentucky and Greater Cincinnati are waiting on more Beckfield graduates to hire, so they can continue providing healthcare to the many people in our community and beyond.

Keep up the good work, nursing students! The faculty, the staff, and the community are waiting for you at the finish line.

Sincerely,

Beckfield College

\*Statistics based on first-time test takers of the NCLEX-RN and NCLEX-PN examinations during the period of January 1, 2023, to December 31, 2023.
